## KONVERGE FIELD SERVICE SYSTEM

INSPECTIONS, AUDIT, INVENTORY, CONDITION RATING

### Simple, reliable, accurate Field Service

Paper-based audit, inspection, and inventory processes are time-consuming and prone to errors. When looking for a solution to reduce paper, save money and time, and get better data faster - think Konverge Field Service System. KFSS provides flexible and powerful field inspection, auditing and inventory processing capabilities.

Using the latest Motion Computing data collection solutions, we transform field and site inspection processes, providing strong efficiency and improving availability of critical data for reporting and analysis. Optimize field data collection processes with powerful and user-friendly electronic data capture, photograph capture, bar code identification and workflow management.

#### Features of KFSS

- **Inspection** – robust data gathering capabilities with photos and barcodes
- **Audit** – full audit trail support to maintain the integrity of records
- **Inventory** – detailed listing of assets, parts and components
- **Condition Rating** – asset rating based on your specific metrics and intensities
- **Reporting** – precise and flexible insight into your assets

#### Benefits of KFSS

- Increased efficiency and accuracy of the data by eliminating paper collection and manual re-entry.
- Zero paperwork required from data collection through to report distribution.
- Less time for data collection and consolidation means lower cost of inspection
- Identification of risks and opportunities enabling organizations to be proactive
- Reduction of administration burden and costs
